

**DON'T LET CIGARETTE WRECK
YOUR MOOD**

GREEN DETECTOR

WHAT IS GREEN DEDECTOR?

Green Detector mobile application has been developed to protect rights of people who do not use tobacco products and protect smoke-free zone. You can notify the venue having violated the ban and provide it to be inspected by Green Detector mobile application.

HOW IS IT USED?

Green Detector can be downloaded for smart phones having Android and IOS operating system and can be used as web-based for other mobile devices. To use application, it is necessary that user is signed up to the system via his/her e-mail address.

CONFIDENTIALITY

Information of users shall not be transferred to any third party.

HOW IT WORKS?

- When the user witnesses to violation of ban of tobacco products use indoor, he/she lists the venues in the surroundings by using "Detect Location" function of Green Detectors.
- After selecting the venue where the violation has been made, he/she notifies the violating by "Notify Violation" button without having to enter any personal data.
- Notification of the user is sent to Ministry of Health, and then to closest field inspection team from there.
- It is provided that the teams inspect the subject venue.
