

# INTERNATIONAL INTERNSHIP PROGRAM

The International Internship Program is a newly implemented internship program by Turkish Green Crescent that allows young people to comprehend and contribute to various works of the association as well as gain experience in preventive and rehabilitative public health, and advocacy works.

Depending on their, education background, previous experiences and interest, participants are deployed to work in the related department at the headquarter of the association. Trainees will also have the chance to take part in several projects as well as engaging in consultation sessions and training programs provided by the Green Crescent Consultancy Center (YEDAM). Nevertheless, this is a unique opportunity to develop competencies on the field, to gain awareness on socially relevant topics and to discover new cultures and lifestyles through peer-learning.
